DETAILED ACTION

Priority

This application is a 371 of PCT/SE04/00738 05/13/2004, and the claim of foreign priority under 35 U.S.C. § 119(a)-(d) to Sweden 0301446-1 05/16/2003 is acknowledged.

Status of Claims

Claims 1-9, 18, 19, and 21-24 are currently pending in the application. Claims 10-17, and 20 have been canceled.

Receipt is acknowledged of amendment / response filed on October 31, 2007 and that has been entered.

Claims 18-19, and 21-24 are withdrawn from further consideration pursuant to 37 C.F.R. 1.142 (b) as being drawn to a non-elected subject matter.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement (IDS), filed on 05/25/2006, which has been entered in the file.

Response to Election/Restriction

In response to the restriction requirement, Applicants have elected Group II, [which includes claim 8 only, drawn to compounds] is acknowledged. Because Applicants did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election **without** traverse [MPEP 818.03(a)]. However, during a telephonic interview with Ms. Karen Kondrad (Attorney for Applicant) on November 20, 2007,

Applicant has agreed to cancel non-elected claims 18, 19, and 21-24. On the other hand, Examiner has agreed to rejoin claims 1-7 and 9 (Group I) with the elected Group II, because they commensurate within the scope of elected invention. Therefore, the requirement for restriction and election of species is still deemed proper.

Applicants preserve their right to file a divisional on the non-elected subject matter.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting, as being unpatentable over claims 1-5 of co-pending Application No. 11/575,635. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to the same art recognized subject matter. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The compounds and compositions taught by co-pending application are similar to instant application because a reference anticipating one set of claim will render the other obvious and it would have been obvious to one of ordinary skill in the art at the time of the invention was made

since Besidski *et al* teach the generic compounds and compositions which are similar to the instantly claimed compounds and compositions. The subject matter claimed in the instant application is fully disclosed and covered in the co-pending application. The disclosure of Besidski *et al* that teach many permutation and combination substitutions (including various Markush variable substitutions, such as R¹, R², and R³ etc), which would easily place Applicants invention in possession of the public at the time of Applicants invention was filed. The indiscriminate selection of "some" among "many" is *prima facie* obvious, *In re Lemin*, 141 USPQ 814 (1964). Therefore, in the instant case, one skilled in the chemical art would be motivated to choose to replace variable substitutions in permutation and combinations in formula (I) to obtain the desired products in view of the known teaching of the art. The claimed compounds are so closely related structurally to the homologous and /or analogous compounds of the reference as to be structurally obvious therefore in the absence of any unobviousness or unexpected properties. Moreover, any other differences are but obvious structural modifications, which would be apparent to one skilled in the chemical art that can use similar substitutions, would expect to have the same or essentially the same results. Therefore, in looking at the instant claimed compounds as a whole, the claimed compounds would have been suggested to one skilled in the art unless unobvious or unexpected results can be shown.
